

## What environmental issues should be considered in the EIS?

Based on past meetings with the community, WSF has already identified some environmental issues to study in the EIS. Many of these concerns came from public comments.

- Traffic Impacts on Local Roads
- Stormwater Run-off from Additional Impervious Surface (pavement)
- Impacts to Fort Casey State Park and Camping Area
- Dive Park / Conservation Area Relocation
- Impacts to Fish Habitat and Migration
- Impacts to Keystone Spit
- Impacts to Crockett Lake and Tide Gate
- Vessel Emissions
- Vessel Noise
- Vessel Fuel Efficiency

**Is there anything else we should consider?**
